We had the gratification of witnessing a very pleasing event on Sunday last. The "Chapel of Lourdes" in St. Mary's Catholic church, in this city, had been beautifully decorated with lights and flowers for the oc-casion of the marriage of Mr. S. S. Semmes and Miss Frances Morriss, both of Oscola, Arkanias. After the High Mass, the priest and attendants proceeded to the chapel, fol-lowed by the bridal pair and their friends, who filled the marble floor—a picturesque group—while the choir sang an Am Maria to her in whose honor the beautiful statue and artistic surroundings were erected. The hymn artistic surroundings were erected. The hymn ended, the marriage rite was performed impressively by Father Aloysius, the organ accompanying his words and blessing by a Voluntary, which was changed into the triumphal Wedding March as the happy pair left the sanctuary and reached the vestibule, amid the hearty congratulations of the many well-wicker who had introduced their words.

This unfavorable dry, hot wind blowing at periods through the day and night, from the west, northwest, east and northeast, produced the insect we call trust. They are very minute insects too small to be seen only with a fine insects, too small to be seen only with a fine microscope. Millions of these parasites col-lect on a leaf and suck the very life-sap from the plant and dries it up. Cotton is an air plant, and requires but little rain to sustain it, and had it not been for the 'rust' the crop would have been an average one. But wha will compensate to some extent for the drought and blight, the yield of lint will be nusually great, and that of seed prop. onately small. There will be not only

Fire& Burglar-Proof

DETROIT SAFE CO. Sure Pretection from Fire-Safety,

Utility and Beauty Combined. THE DOOR-FRAME AND JAMES OF THIS Safe are made of MALLEABLE ROLLED STEEL, with six flanges or rebates, on which the company holds a patent, the advantages of which are these:

It is much thinner and stronger in proportion to thickness than cast-fron, and consequently its power to conduct heat through the joint between door and jambs is much less than in cast-fron, and will not crack.

A much closer joint can be obtained through the whole succession of its flanges than can be obtained with cast-fron.

The Bolt work is all placed in the inner flanges. The filling between walls is six inches thick, which no amount of heat can exhaust.

The corners of the Safe are rounded and made solid by Bent Plate, thereby affording greater strength to resist the concassion which a heavy fall or falling timbers might give it.
